Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP43-14120 in view of Nakane et al '493 and Brown et al '962. The '14120 document discloses the sequential use of a plurality of punch rollers in order to form a progressive recessed portion in a pipe member (see figure 2 and translation). Lacking any clear distinguishing features a headrest stay is read on to the pipe member as disclosed in '14120.

Newly amended claim now requires that the outer periphery portion of the two rollers be asymmetrical and that the first punch roller have an inclined surface which slopes downward toward the rounded portion, while the second punch roller have an inclined portion which slopes downward toward the punch portion where the punch portion includes a vertical portion and a flat portion which intersect at a right angled portion. However, both Nakane and Brown teach a method and apparatus for tube indentation where brown teaches the use of a punch having the claimed shape of the first punch roller (Brown, figure 7), while Nakane teaches the use of a punch having the shape of the second claimed punch roller (Nakane, figure 3). Therefore for it would have

been obvious to one having ordinary skill in the art to modify the shape of the punch rollers of '14120 with the shapes of the punches of Nakane and Brown since such a modification would only depend on the desired shape(s) of the groove(s) to be formed and such a combination would yield predictable results.

Response to Arguments

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
